QUOTATION TABULATION

General Services
(Procurement) Division

Thank you for your response to our Request for Quotation # D210-048-R2. For your information, the following is a tabulation of all the responses we received. If you have questions, please contact me at the phone number or mailing address shown above. William D. "Bill" Noyes, CPPO, CPPB, Senior Procurement Agent

This was a "Multiple Award" quotation to lock in pricing during the contract period (through December 31, 2010) with all vendors who respond to this RFQ and whose products are determined to meet our requirements. During the contract period, MoDOT District 2 reserves the right to place orders, using the "lowest and best" principle of award, from the vendor supplying quoted units that best meet the needs of the facility for which the unit will be purchased.

Liquid Storage and Dispensing Apparatus – Each base unit to include, as a minimum:

- A) Two sets of containers capable of storing and dispensing 120-130 gallons each (one container to be used for motor oil and one container to be used for hydraulic fluid). Note: These may be two 120-130 gallon containers or these may be multiple containers, provided the smaller containers are wedged together so they can simultaneously fill and dispense product (for example two 65-gallon connected containers would equal 130-gallon capacity). Containers may be either polyethylene or metal. Vendors who can quote various types of units (single containers / multiple wedged containers / poly containers / metal containers) should provide separate responses on each available option for our consideration.
- B) A self-supporting stand/ rack (with all necessary hardware) plus spill containment for the entire unit.
- C) All necessary valves, faucets, drip pans, hoses, fittings, filters, pumps, vents, site gauges, etc. to have a fully safety-compliant "ready to use" working unit capable of handling both products listed above. All valves and fittings should be at least 3/4" NPT (national pipe thread). MoDOT crews will assemble units.

Qty	U/M	Lubricant Storage & Dispensing Apparatus	Seneca Distribution	MFA Oil Company	Champion Brands	P.B. Hoidale	United Petroleum
13	EA	Base Unit Described Above:	864.51 each \$11,238.63	879.00 each \$11,427.00	1160.82 each \$15,090.66	1197.00 each \$15,561.00	1256.50 each \$16,334.50

"No Quote" responses were received from Shoal Creek Distributing (product not available at this time), Jet Bulk Oil (could not quote flexible quantity terms), & Fluidall (quotes will be submitted by local distributors), but each asked to be kept on our vendor list for future opportunities. Notification of the online posting of this RFQ opportunity was also sent to Allied Industrial Equipment, Allied Oil & Supply, Engineered Lubricants, Fastenal, Hightowers Petroleum (MBE), IFH Group, Northtown Mechanical (MBE), Riekes Material Handling, R.L.Hoener, Safety-Kleen, Stadium Sheet Metal (WBE), and Woody's Municipal Supply, but no responses were received from any of these vendors.
